- Red Line
- Wider Whitewalls
- Extra Wide Whitewalls
- Specialty Designs

All markings including brand name are removed above the whitewall for that nice clean look

Toyo has one of America's newest and most modern facilities in White, GA. Most sizes are built in the US but some sizes are still built in other facilities. Toyo is completing a large expansion of its US facility so that it can accommodate most of the sizes listed.

With its UTQG rating of 640AB, this tire is the highest rated classic tire in the industry. You should be cautious of tires with a B traction rating (B being the first letter). The new Diamond Back II has a rating of 44 psi which makes it an excellent candidate for wider whites and extra wide whites. With its solid shoulder ribs and non-aggressive tread style, it is, by far, the best looking tire available and its prices lower than competitive products.

TIRE SIZE	HEIGHT	WWW WIDTH	TREAD WIDTH	SECTION WIDTH	RECOMMENDED RIM WIDTH	PRICE
205/75R14	26.1	2½	5.4	7.8	5 - 7	\$218
